DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/9/2006 has been entered.

Response to Amendment

In response to the office action mailed on the Applicant has amended claim 1, withdrawn claims 12-14, 29-31, 33-44, and 50-52. Currently claims 1-5, 12-14, 29-31, 33-44, and 48-52 are pending in the current application.

Response to Arguments

Applicant's arguments with respect to claims 1-5, 48, and 49 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 48 and 49 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. **As to claim 48**, recitation “means for accessing the sacral position of the sacral vertebral body” is indefinite because Applicant’s disclosure is vague with respect to what structure(s) is/are considered “means for accessing the sacral position of the sacral vertebral body.” **As to claim 49**, recitation “means for accessing the anterior surface of the sacral vertebral body” is indefinite because applicant’s disclosure is vague with respect to what structures(s) is/are considered “means for accessing the anterior surface of the sacral vertebral body.”

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the fragmenting element, means for accessing the sacral position, instrument body, and means for accessing the anterior surface must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended

replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claim 1 is objected to because of the following informalities: in claim 1 line 9 consider replacing "...a distal portion..." to "--said distal portion--". Appropriate correction is required.

Allowable Subject Matter

Claims 1-5 are allowable over the prior art of record.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent No. 6,440,138 is cited to show surgical cutting instrument.
